

# NATIONAL FORKLIFT SAFETY DAY

JUNE 14  
2022

## SAFETY TIPS

# 1

Examine the forklift before each use. Operators should complete a checklist as recommended by the forklift manufacturer.

# 2

Wear your seatbelt and personal protective equipment (PPE) based on application.

# 3

Pay attention to the layout of your workplace and any danger zones.

# 4

Forklift speed - take caution with corners. Avoid sudden stops or a quick directional change to minimize the risk of tipping.

# 5

Know the capacity of the forklift. Ensure you only load your forklift with loads within its capacity weight.
